PROFESSIONAL SUMMARY

Senior DevOps / SRE engineer with 6+ years building and operating large-scale cloud infrastructure. Expert in Kubernetes, Terraform, and multi-cloud architectures (AWS, GCP, Azure). Reduced infrastructure costs by \$2 M annually while maintaining 99.99% uptime SLAs. Led teams of 5+ engineers; regular conference speaker on cloud-native operations.

WORK EXPERIENCE

CloudFirst Corp | Senior Site Reliability Engineer | 2021 – Present

- Architected and managed multi-tenant Kubernetes clusters serving 200+ microservices across AWS, GCP, and Azure
- Implemented full Infrastructure-as-Code with Terraform managing 500+ cloud resources; zero manual config drift
- Built GitOps platform (ArgoCD + GitHub Actions) enabling multiple deployments daily with zero-downtime rollouts
- Designed observability stack: Prometheus, Grafana, Jaeger distributed tracing, ELK — 500+ actionable alerts
- Reduced MTTR from 4 hours to 22 minutes for P0/P1 incidents through runbook automation and on-call tooling
- Optimised cloud spend by \$2 M/year via right-sizing, Spot instances, and Reserved Instance purchasing
- Implemented zero-trust security with Istio service mesh and OPA policy engine

ScaleOps | DevOps Engineer | 2019 – 2021

- Migrated 50+ services from bare metal to AWS EKS — reduced operational overhead 60%
- Automated configuration management for 200+ servers with Ansible playbooks
- Deployed HashiCorp Vault for secrets management and automated TLS certificate rotation
- Integrated Snyk and SAST/DAST tooling into CI/CD pipelines for continuous security scanning
- Designed multi-region disaster recovery achieving RPO < 15 min and RTO < 30 min

StartupOps | Systems Engineer | 2018 – 2019

- Built initial AWS infrastructure and Terraform modules from scratch
- Implemented logging and monitoring using ELK stack and Prometheus/Grafana
- Set up first Jenkins CI/CD pipeline with Docker containerised builds

EDUCATION

Master of Science in Computer Engineering | Georgia Institute of Technology | 2018

Bachelor of Engineering in Electronics | IIT Bombay | 2016

SKILLS

Kubernetes (expert), Docker, Terraform, Ansible, Helm, ArgoCD, Flux, AWS (Expert: EC2, EKS, ECS, Lambda, RDS, S3, CloudFront, Route53, IAM, Cost Explorer), GCP (GKE, Cloud Run, BigQuery), Azure (AKS, Azure DevOps), CI/CD (GitHub Actions, Jenkins, GitLab CI), Prometheus, Grafana, Jaeger, ELK Stack, Istio, Linkerd, HashiCorp Vault, Consul, Python, Go, Bash, Linux, Networking (TCP/IP, DNS, BGP basics, load balancing), Security (zero-trust, OWASP, supply-chain hardening), SLO/SLA management, Incident management, chaos engineering (LitmusChaos)

PROJECTS & ACHIEVEMENTS

Multi-Cloud K8s Platform: Serves 200+ microservices with 99.99% SLA.

Cloud Cost Initiative: \$2 M/year savings through automated right-sizing.

GitOps Platform: Deployment lead time cut from 3 days to 45 minutes.

KubeCon NA 2022 Speaker: "Zero-Trust Kubernetes at Scale in Multi-Cloud Environments".

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) (2022), Certified Kubernetes Security Specialist (CKS) (2023), AWS

Certified DevOps Engineer – Professional (2021), HashiCorp Certified Terraform Associate (2022), Google
