PROFESSIONAL SUMMARY

Junior software developer with 2 years of experience building web applications using Python and Java. Comfortable with REST API development, relational databases, and Git-based workflows. Currently expanding knowledge in cloud deployment and automated testing.

WORK EXPERIENCE

StartupTech Inc | Junior Software Developer | 2022 – Present

- Built backend REST APIs using Python Flask for an inventory management system
- Wrote SQL queries and maintained MySQL database schemas with 50 K+ records
- Used Git for version control and participated in weekly peer code reviews
- Wrote unit tests improving code coverage from 40% to 70%
- Joined Agile sprint planning, daily stand-ups, and retrospectives
- Debugged and resolved 30+ production bugs within agreed SLA windows

WebSolutions Ltd | Software Development Intern | 2021 – 2022

- Built CRUD web applications using Java Spring Boot
- Created HTML/CSS frontend templates aligned with designer mockups
- Contributed to shared Git repositories following branching workflow

EDUCATION

Bachelor of Science in Computer Science | State University | 2021

SKILLS

Python, Java, Flask, Spring Boot, MySQL, PostgreSQL, Git, HTML, CSS, JavaScript (ES6), REST APIs, Agile/Scrum, Jira, unit testing (pytest, JUnit)

PROJECTS & ACHIEVEMENTS

Inventory Management API: REST API with Python Flask and MySQL for product tracking, deployed on a VPS.
Personal Portfolio Site: Simple responsive website built with HTML, CSS, and vanilla JavaScript.
Bug Tracker CLI: Command-line tool in Python that logs and queries bugs stored in SQLite.
