PROFESSIONAL SUMMARY

Entry-level data analyst with 1.5 years of experience performing basic data analysis and reporting. Familiar with Python for data manipulation and some exposure to machine learning through coursework. Learning SQL and data visualisation on the job.

WORK EXPERIENCE

DataInsights Co | Junior Data Analyst | 2023 – Present

- Cleaned and formatted customer datasets using Python pandas and Excel
- Wrote basic SQL queries to pull data from internal databases for reports
- Created charts and summary tables in matplotlib and Excel for team presentations
- Helped a senior analyst run a logistic regression model in scikit-learn (followed existing code)
- Prepared weekly data summaries for the business stakeholder review meetings

University Research Assistant | Data Collection Assistant | 2022 – 2023

- Collected and manually cleaned survey data for a psychology research project
- Entered data into SPSS and ran basic descriptive statistics
- Assisted in preparing charts for research paper submissions

EDUCATION

Bachelor of Science in Statistics | State University | 2022

SKILLS

Python (pandas, numpy basics), SQL (basic SELECT queries), Excel, matplotlib, descriptive statistics, SPSS, data cleaning, report writing, Jupyter notebooks

PROJECTS & ACHIEVEMENTS

Sales Summary Dashboard: Excel pivot-table dashboard for weekly sales reporting.

University Capstone: Basic linear regression in Python to predict student grades from study hours.

Personal: Completed Andrew Ng's Machine Learning course on Coursera (in progress).
