PROFESSIONAL SUMMARY

Frontend developer with 2.5 years of experience building React single-page applications. Proficient in JavaScript ES6+, TypeScript basics, and modern CSS. Delivered production-ready UIs for 3 client applications, integrating REST APIs and collaborating closely with designers.

WORK EXPERIENCE

WebApp Agency | Frontend Developer | 2022 – Present

- Built and maintained React SPAs for 3 client projects using functional components and hooks
- Implemented responsive layouts with CSS Grid, Flexbox, Bootstrap, and Tailwind CSS
- Integrated REST APIs using Axios, managed local state with useState/useReducer
- Added TypeScript type definitions to key components to improve maintainability
- Participated in code reviews and addressed UI bugs reported by QA
- Worked directly with designers to implement Figma mockups as React components

Freelance | Junior Frontend Developer | 2020 – 2022

- Created HTML/CSS/JavaScript websites for small-business clients
- Built basic React applications for internal admin tools
- Leveraged Bootstrap for rapid responsive prototypes

EDUCATION

Bachelor of Science in Computer Science | State University | 2020

SKILLS

React, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Bootstrap, Tailwind CSS, REST API integration, Axios, React hooks, Git, Figma, Agile/Scrum, basic debugging in Chrome DevTools

PROJECTS & ACHIEVEMENTS

E-commerce Frontend: React SPA with product catalog, cart, and checkout integrating a REST backend.
Analytics Dashboard: React application with chart.js data visualisations for an internal reporting tool.
Portfolio Site: Personal portfolio with React, custom CSS animations, and responsive design.
