

Ronit Avrahami

Senior Machine Learning Engineer

Petah Tikva · 054-2276589 · ronit.avrahami87@gmail.com · linkedin.com/in/ronit-avrahami-5m8 · github.com/ravrahami-data

SUMMARY

Senior ML engineer with a data-engineering backbone: ten years building the full path from raw events to trained models. I build the pipelines, the feature platform, and the models that sit on top of them - and I care equally about all three.

EXPERIENCE

Senior Machine Learning Engineer *Heliosoft, Tel Aviv* 05/2022 - Present

- Lead the ML platform group (6 engineers): feature store, training pipelines and online serving for 30M predictions/day.
- Designed a Feast-based feature store over S3/Athena with Redis online serving; online-offline skew incidents at zero since 2024.
- Rebuilt training-data pipelines in Spark on EMR - 4TB/day, run cost down 44%, SLA misses from weekly to none.
- Trained ranking models (XGBoost, later two-tower neural retrieval) lifting CTR 9.5% across 3 product surfaces.
- Drove migration of 40+ Airflow DAGs to managed MWAA with no missed SLAs during the cutover.

Data Engineer, later Machine Learning Engineer *Qualisense, Petah Tikva* 01/2019 - 05/2022

- Launched streaming ingestion (Kafka, Spark Structured Streaming) for industrial sensor data at 250K events/sec peak.
- Owned the Airflow platform - 120 DAGs serving analytics, data science and finance.
- Moved into modeling in 2020: trained predictive-maintenance models (survival analysis, GBM) that cut unplanned downtime 18% for pilot customers.
- Embedded model scoring directly in the ingestion path, achieving sub-second scoring on live sensor streams.

Data Engineer *Bluewave Systems, Ramat Gan* 09/2016 - 01/2019

- Developed batch ETL (Python, SQL, early Airflow) consolidating 12 sources into a Redshift warehouse.
- Brought the nightly warehouse build down from 9 hours to 2.5 via incremental loads and distribution-key redesign.
- Wrote a checks-as-code data-quality framework that caught upstream breakage before it reached dashboards.

SKILLS

Data platform: Spark, Kafka, Airflow, Feast, dbt, Redshift, Athena · **ML:** Python, XGBoost, scikit-learn, PyTorch (working level)
MLOps: MLflow, SageMaker, Docker, Kubernetes · **Cloud:** AWS (EMR, MWAA, S3, Redshift) ·
Other: SQL, Terraform (user level)

MILITARY SERVICE

Full military service, Israeli Air Force - technical unit (2010 - 2012).

EDUCATION

M.Sc. Data Science (part-time), University of Haifa	2018 - 2020
B.Sc. Computer Science, Technion - Israel Institute of Technology	2012 - 2015

LANGUAGES

Hebrew - native, English - fluent.
