LANGUAGES

Hebrew Native
English Fluent

Summary

Penetration tester, 4 years. Web application and internal infrastructure assessments, from scoping through report and retest. OSCP certified, Unit 8200 background.

Experience

Penetration Tester · Argaman Networks, Application Security Team 2024 - Present

- Gray-box web and API penetration tests on company products before major releases, ~10 engagements per year.
- Found an authentication bypass in the customer portal pre-release; worked with the dev team on the fix and retest.
- Run purple-team exercises with the SOC: execute attack chains, map to MITRE ATT&CK, help tune detections.
- Internal infrastructure tests: AD enumeration, privilege-escalation paths, lateral movement mapping with BloodHound.
- Write findings reports, present to development teams, track remediation to closure.

Junior Penetration Tester · Sentrix Defense, Tel Aviv 2022 - 2024

- Performed web application pentests for external clients under senior supervision (Burp Suite, OWASP methodology).
- Ran network scans and vulnerability assessments with Nmap and Nessus.
- Responsible for drafting report sections and reproducing findings for QA before delivery.
- Built small Python tools for recon automation and wordlist handling, used by the team.

Unit 8200 · IDF 2018 - 2021

- Technical intelligence role; network traffic analysis. Details under NDA.
