

Boris Kagan

Embedded Software Engineer

Haifa •053-8274196 •boris.kagan.embedded@gmail.com •linkedin.com/in/boris-kagan-7b19a4

EDUCATION

B.Sc. Electrical Engineering

2015 – 2019

Technion – Israel Institute of Technology, Haifa. GPA 82. Final project: sensor data acquisition board based on STM32 microcontroller.

Professional course: Real-Time Embedded Systems and RTOS

2023

External studies program, 120 hours. Topics: FreeRTOS, device drivers, debugging techniques.

PROFESSIONAL EXPERIENCE

Embedded Software Engineer, Radenta Systems, Haifa

Mar 2024 – Present

- Develop and maintain firmware in C for STM32F4-based control units, both bare-metal and FreeRTOS configurations.
- Implemented UART, SPI and I2C drivers for in-house sensor and interface boards.
- Ported legacy LabVIEW test sequences to embedded C self-test firmware running on the target.
- Debug hardware/software integration issues using SWD/JTAG, oscilloscope and logic analyzer.
- Participate in code reviews and maintain firmware documentation.

Hardware Test Engineer, Radenta Systems, Haifa

2019 – 2024

- Responsible for electrical testing and bring-up of RF and power supply boards.
- Built automated test benches in Python and LabVIEW; reduced regression test time by approximately 40%.
- Wrote test procedures, ATP documents and failure analysis reports.
- Supported production line with debugging of returned units.

TECHNICAL SKILLS

Programming: C (main), Python, C++ (basic)

Embedded: STM32 (HAL and register level), FreeRTOS, UART/SPI/I2C/CAN, interrupts, ADC/DMA

Tools: STM32CubeIDE, SWD/JTAG debuggers, oscilloscope, logic analyzer, Git, LabVIEW

Hardware: schematic reading (Altium), board bring-up, soldering and rework

LANGUAGES

Russian – native. Hebrew – fluent. English – good (technical reading and writing).

ADDITIONAL INFORMATION

Immigrated to Israel in 2014. Exempt from military service.
