SKILLS

- React 18/19
- TypeScript
- Next.js
- Redux Toolkit
- RTK Query
- Vite
- Playwright
- Storybook
- Tailwind CSS
- HTML/CSS
- Web Vitals
- Node.js (tooling)

EDUCATION

B.Sc. Computer Science
Afeka College of Engineering
2017 - 2021

LANGUAGES

Hebrew

English

Native

Fluent

Summary

Frontend developer, 5 years building React applications at scale. Owns performance, build tooling and design-system work end to end. TypeScript-first; measures before and after every change.

Experience

Frontend Developer · Cloudrise, Tel Aviv Mar 2023 - Present

- Led migration of the core dashboard from CRA/Webpack to Vite + React 18; cold build 210s → 24s, HMR under 300ms.
- Cut main bundle 38% (1.4MB → 870KB gzip) via route-level code splitting and a dependency audit.
- Improved LCP on the customer portal from 4.1s to 1.9s (p75, CrUX); INP under 200ms on top 10 routes.
- Built shared design system: 42 components, Storybook, design tokens. Adopted by 3 product teams; UI PR review time down ~30%.
- Introduced Playwright E2E suite (140 specs, 6 min in CI); release regressions from ~3/quarter to near zero.
- Upgraded to React 19: migrated forms to Actions + useOptimistic, removed two legacy state libraries.

Frontend Developer · BitSage, Tel Aviv Jul 2021 - Feb 2023

- Built trading dashboard in React 18 + Redux Toolkit; real-time WebSocket updates at 20 msg/s with no dropped frames.
- Implemented RTK Query data layer; deleted ~4K lines of hand-written thunks and cache logic.
- Delivered dark mode and full RTL support across the product in one quarter.
- Wrote the team's frontend conventions doc (naming, folder structure, testing policy) still in use today.
