SUMMARY

Machine learning engineer with 7 years spanning classical models to production LLM systems. Deep hands-on experience in fine-tuning, retrieval pipelines and the MLOps required to keep them healthy in production. Unit 8200 alumnus; Technion CS graduate.

EXPERIENCE

Senior Machine Learning Engineer *Brightpath AI, Tel Aviv* Oct 2022 - Present

- Architected and now operate the company LLM platform serving 3 product lines: fine-tuning, evaluation and serving for models up to 70B parameters.
- Fine-tuned domain LLMs (LoRA/QLoRA on Llama-family models), lifting task accuracy from 71% to 89% over the prompted baseline.
- Deployed a RAG pipeline (Qdrant, hybrid BM25 + dense retrieval, cross-encoder reranking) answering 40K queries/day at p95 of 1.8s.
- Cut inference cost 62% through AWQ quantization and moving batch scoring to spot GPU nodes.
- Designed the offline and online evaluation harness (2K-sample golden set, LLM-as-judge calibrated against human ratings) that gates every model release.
- Led the ML hiring loop as the team grew from 3 to 8 engineers.

Machine Learning Engineer *DataSphere Analytics, Tel Aviv* Jun 2019 - Oct 2022

- Shipped demand-forecasting models (gradient boosting, later a temporal fusion transformer) for 800 retail SKUs; MAPE improved from 19% to 11%.
- Productionized training with MLflow and SageMaker Pipelines, shrinking experiment-to-deploy time from 3 weeks to 4 days.
- Implemented feature monitoring and drift alerting; caught two silent-degradation incidents before SLA breach.
- Served models behind SageMaker endpoints with shadow deployments - zero rollout regressions across 2021-2022.
- Collaborated with data engineering on PySpark feature jobs processing 2TB of events daily.

MILITARY SERVICE

Data & Algorithms Team *IDF, Unit 8200* 2012 - 2016

- Led a 4-person analysis team; built NLP tooling for large-scale text triage (details classified).

SKILLS

ML: PyTorch, Hugging Face Transformers, PEFT/LoRA, scikit-learn · **LLM/RAG:** vLLM, Qdrant, pgvector, evaluation tooling

MLOps: MLflow, SageMaker, Docker, Kubernetes, GitHub Actions · **Data:** Python, SQL, PySpark, Airflow

E D U C A T I O N

B.Sc. Computer Science, Technion - Israel Institute of Technology, cum laude 2016 - 2019

L A N G U A G E S

Hebrew - native, English - fluent.
